ABSTRACT

Five suprageneric names in current use are validated formally:
Peridiscales, Ixerbaceae, Lophiocarpaceae, Saccolomataceae, and Stixaceae.
Phytologia 90(3): 416-417 (December, 2008).

KEY WORDS: Peridiscales, Ixerbaceae, Lophiocarpaceae, Saccolomataceae,
Stixaceae

An unanticipated delay in publication by Doweld of a summary of the classification of plants in a broad sense requires publication of five suprageneric names presently in current use (Thorne & Reveal 2007; Smith et al. 2006) so that they might be used. Justification and placement of these taxa are found in the above publications.

Peridiscales Doweld, ord. nov.

Based on a full and direct reference to the description in Latin associated with *Peridiscaceae* Kuhlm. in Arq. Serv. Florest. 3: 4. 1950, *nom. cons.*

Ixerbaceae Griseb. ex Doweld & Reveal, fam. nov.

Arbor glabra, ramis teretibus rugosis; folia opposita, alterna et subverticillata, coriacea, semperfurentia, lineari-elongata, glanduloso-serrata; flores 5-merus, in panicula brevi pauciflora axillari; ovarium superium, 5-lobum, 5-loculare, styli 5; capsula coriacea, dehiscens loculicide, semina 1-2 per loculum.

Lophiocarpaceae Doweld & Reveal, fam. nov.

Frutex vel herbae; folia alterna sessilia linearia, integerrima; flores hermaphrodoti virides in spicis; bracteae et bracteolae rhachidis persistentes

membranaceae; perianthium 5-partitum cum segmentis herbaceis persistentibus in fructu immutatis; ovarium superum substipitatum, stigmata 3-4; semina erecta.

Saccolomataceae Doweld, fam. nov.

Herbae terrestres, rhizomata repentes vel erecta aliquantum truncata; fila vascularia petioli ω -formia; laminae pinnatae vel decompositae, articuli pilorum nulli, venae discretae; sori in venis; indusia scrotiformia vel cyathiformia.

Stixaceae Doweld, fam. & stat. nov.

Basionym: *Stixeae* Hallier in Beih. Bot. Centralbl. 39: 26. 1923.

ACKNOWLEDGEMENTS

I wish to thank Billie Turner (TEX) and Guy Nesom for reviewing the paper. I am especially gratefully for Nesom's thorough review of the Latin.
